# ONLINE RADICALIZATION

What is online radicalization:
Online radicalization is when someone is lead to believe and adopt extreme social, political and religous ideas on the internet.

Most used social media apps to recruit radicalized people or people with the same extreme ideas:
chatrooms
Facebook
Youtube
Dark web
Twitter

We looked on facebook for 20 minutes, and we came up with over 10 different facebook pages, which promoted hate and violence towards various minorities

How to avoid online radicalization
The way you can avoid it is by:
Common sense
Knowledge about the platforms and think about the consequenses you and people around you will have

Facts about the internet:
We live in a digital world where 81% of the population of the wold have access to the internet, even though only small percentage of people get radicalized, a small percentage of 6 billion people is still a lot
